Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-33, drawn to chessboarding discrete values, classified in class 380, subclass 236 whereby the criteria states "Subject matter wherein a parameter of an audio signal is varied so as to render the sound unintelligible in a conventional receiver."
 - II. Claims 34-46, drawn to analyzing energy levels of frequency magnitude components of a signal, classified in class 382, subclass 191 whereby the criteria states "Subject matter wherein the frequency or phase of an electromagnetic spectrum of the pattern is used to recognize the pattern."

The inventions are distinct, each from the other because of the following reasons:

1. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I and II has separate utility such as Group I is directed towards chessboarding discrete values and Group II is directed towards analyzing energy levels of frequency magnitude components of a signal. See MPEP § 806.05(d).
2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
